1. FBIS is disappointed with denial of our request for collocation of a monitoring facility, but understands your concerns in this matter. We would like to reiterate, however, our request for a hearability survey [Redacted]. We are continuing to investigate various options for monitoring in the southern Germany area and our requirement for a survey in the area still stands. [Redacted]

2. Would you please reconsider allowing FBIS to conduct a hearability survey [Redacted] site. Such a survey would require use of antennas currently in place at the site. It would be conducted by two staff personnel and could be concluded within two weeks of work. [Redacted]
